

UFS 821 Update procedure with USB-stick

Preparing the USB-stick

1. The USB-stick must be completely empty – if not please first of all clear all data on it
2. Insert a new folder „kathrein“ onto the USB-stick.
3. Insert into this „kathrein“ folder a second folder „ufs821“
4. Copy the update file into the folder „ufs821“.

Carrying out the Update

1. Switch off the receiver UFS 821 using the mains switch
2. Insert the USB-stick on the front panel situated USB-socket
3. Switch on the receiver using the mains switch and at the same time hold down the menu button on the front panel
4. In the display „Update“ will be displayed after a short time – then the Update process will start with the displayed information „1st Erasingxx“ – only then should one release the held down menu button
5. Once the pdte has been successfully carried out „End“ will be displayed. The receiver goes automatically into Stand-by Modus
6. The USB-stick can then be removed.
