

UFS 922 - V2.00 – Improvements & New Functions

- Media Centre: YouTube integrated (→ see Guide: Media_Netzinterface.pdf)
→ three quality levels – Low, Normal, High (max. 720p videos)
Note: Quality levels set should be matched to the actual Internet connection, i.e. if set to “High” for a 720p Video then an actual slow connection rate can lead to problems – so set then to a lower level
- Media Centre: Shoutcast – Internet radio (→ see Guide: Media_Netzinterface.pdf)
- Media Centre: Optical and functional matching
- EPG: Extension with the YouTube search function (→ call up using TXT key) – search by title, actor, in detail information, full text search
- Timeshift pause/stop-problem solved, if you push after start timeshift with the pause-button the stop-button, so it comes to a freeze-image. It could be only solved with a program change.
- Tele-text – special icon problem in colour bar solved
- Program list saved via the Service Menu onto a USB unit → is now copied directly into the file „kathrein/ufs922“
- Problem on saving regional window program solved
- Hard disk capacity check on receiver start up (when less than 5% is free, a warning report follows)
- After closing Tele-text the Info-banner cannot be opened - solved
- Backup operation:
 - The receiver can be shutdown with multifunction control, press 5s the multifunction control to Standby
 - The receiver can be turn on, when the display message is „Recording“
- JPG display: individual picture display now possible → to do this select in replay/display options the OPT key, with the arrowed keys or the P+/- keys one can move to the next picture
- 4 GB Problem with video replay via UpnP is now solved
- General improvement from cut-function
- DMAX cut-function solved
- Serial timer function extended → specially for program transmissions with series or episode numbering
Note: If the serial timer has already been set using a previous version, then this will not be automatically updated conform with the new principles – the timer must be re-programmed.

Further Options:

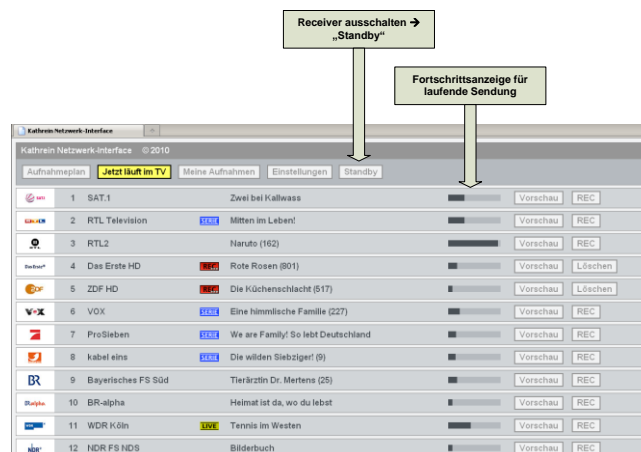

* Screen shots are from the UFS 922 – the UFS 912 operation is identical

Option	Setting possibility	Description
Avoid repeat of episodes	Yes / No	<p>Example: Episode transmission from a specific date are sent as follows: Episode 13 → 14 → 15 → 17 → 18 → 19 → 16 → 20 → 1 → 2 → 3 → 4 → ... Serial programming starts from episode 13</p> <p>In Option Yes: No episode will be saved twice and gaps in the episodes will not be considered, i.e. in this example only the following episodes will be saved: 13 → 14 → 15 → 17 → 18 → 19 → 20</p> <p>In Option No: All episodes will be saved – this can lead to episodes being recorded twice – older episodes can also be saved</p> <p>In this example the following episodes will be saved: Episode 13 → 14 → 15 → 17 → 18 → 19 → 16 → 20 → 1 → 2 → 3 → 4 → ...</p>
Only record this series	Yes / No	<p>If a program name/number enholds a series number – then one can determine that only episodes from a specific series are to be recorded (which episodes will be recorded → see Option „Avoid repeat of episodes“)</p> <p>In Option Yes: Only episodes of a specific series will be recorded</p> <p>In Option No: All episodes, independent of their series number, but considering the Option „Avoid repeat of episodes“ will be recorded I.e. depending on the episode option selected one can have either gaps in the recording series (→ as so transmitted by the program provider) or one can have episodes repeatedly recorded</p>

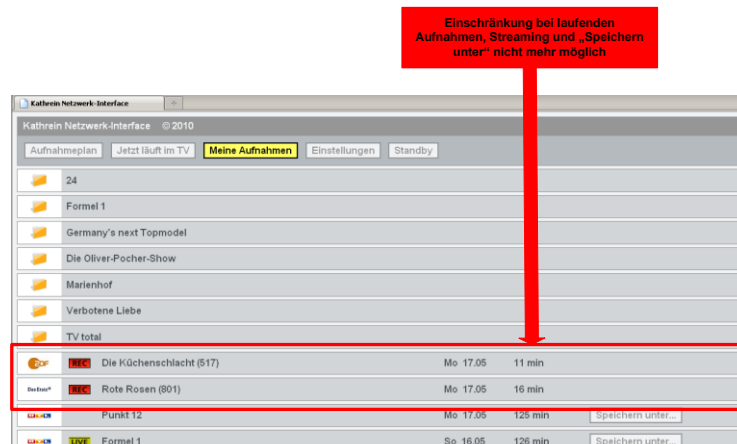

Limit record start from	00:00 – 24:00 hrs	Example: limit record start from 21 hrs to 01:00 hrs I.e. only programmes which start inside these limits will be recorded – allowing one to avoid later repeats during the night
Limit record start to	00:00 – 24:00 hrs	

- Media Centre: Accept the Title-Scroll function in other Media Centre functions
- New keyboard (→ press the STOP key in the actual display)
- Vol +/- and MUTE now possible with opened TXT an Menu
- Extended Network Interface
 - Stream recordings
 - Save recordings (Save under...)
 - Standby function, i.e. receiver can be switched off
 - Blocked streaming on a running recording
 - Progress bar for currently running program
 - Display of all programmes transmitted at a specific time (→ see picture „Pre-view“ - Display)

„Now Running“ – Display

„My Recordings“ – Display

„Pre-view“ – Display

Nach Klicken auf bestimmtes Datum/ Uhrzeit-Feld wird anschließend eine Übersicht der Sendungen zu dieser Zeit dargestellt (→ siehe nächstes Bild)

Sendung um 20:15 Uhr („Prime Time“) optisch hervorgehoben
